Contents

FOREWORD	xi
OPENING ADDRESS	xiii
Professor H Louis, Hannover University, Germany	
JETTING BASICS - MATERIALS	
Investigation of the pure waterjet-workpiece interaction	3
<i>H Y Li, E S Geskin, E I Gordon, New Jersey Institute of Technology, USA</i>	
On the modelling of surface waviness produced by abrasive-waterjets	17
<i>M Hashish, Quest Integrated Inc (formerly Flow Research Inc), USA</i>	
JETTING BASICS - FLUID MECHANICS	
Attenuator's volume influence on high pressure's pulsations in a jet cutting unit	37
<i>R Susan-Resiga, Technical University of Timisoara, Romania</i>	
A theoretical approach to the analysis of gas abrasive two phase flow model for abrasive jet machining	47
<i>N Ramachandran, N Ramakrishnan, Indian Institute of Technology, India</i>	
Measurement of particle and drop velocities in a mixed abrasive waterjet using a forward-scatter LDV system	63
<i>K F Neusen, T J Gores, T J Labus, University of Wisconsin-Milwaukee, USA</i>	
A study of the practicality of cavitating water jets	75
<i>M M Vijay, National Research Council of Canada; J Remisz, Applied Fluid Mechanics; S Tavoularis, University of Ottawa, Canada; C Zou, China University of Mining and Technology; S G Hu, Shanghai Institute of Mechanical Engineering, P R China</i>	
On an energetic semi-empirical model of hydro-abrasive jet material removal mechanism for control and optimization	101
<i>E Capello, Politecnico di Milano; R Groppetti, Universita degli Studi di Perugia, Italy</i>	
MINING AND QUARRYING	
Theoretical evaluation of pick tips assisted by high pressure water jets	123
<i>J Vasek, Mining Institute of the Czechoslovak Academy of Sciences, Czechoslovakia</i>	
Abrasive material in the process of AWJ cutting	135
<i>J Foldyna, P Martinec, Mining Institute of the Czechoslovak Academy of Sciences, Czechoslovakia</i>	
Water jet assisted coal cutting	149
<i>R J Fowell, University of Leeds; J Martin, University of Newcastle upon Tyne, UK</i>	

Problems on the development of some machines assisted by water-jets in Japanese coal mines <i>K Ohga, K Higuchi, Hokkaido University; K Sato, The Coal Mining Research Center, Japan</i>	167
Room and pillar in-seam excavator and roof supporters (rapiers) <i>D A Summers, University of Missouri-Rolla; J Yao, All-State Power Vac, USA</i>	185
Possibility of using jet cutting technology in Polish mining industry <i>L Jarno, KOMAG - Mining Mechanization Centre; A Kalukiewicz, A Klich, University of Mining and Metallurgy, Poland</i>	205
Water jet assisted rock cutting - the importance of jet position <i>R J Fowell, S T Gillani, University of Leeds; A Waggott, formerly University of Newcastle, UK</i>	217
Low pressure abrasive waterjet use for precision drilling and cutting of rock <i>D A Summers, J Yao, J G Blaine, R D Fossey, L J Tyler, University of Missouri-Rolla, USA</i>	233
CIVIL ENGINEERING	
The feasibility of commercial DIAjet use (a case study) <i>R D Fossey, J G Blaine, D A Summers, University of Missouri-Rolla, USA</i>	255
A systematic study of granite slotting with water jets <i>A Bortolussi, R Ciccu, P P Manca, G Massacci, University of Cagliari, Italy</i>	267
DIAjet use in environmental application <i>D A Summers, R D Fossey, J G Blaine, University of Missouri-Rolla, USA</i>	281
NEW DEVELOPMENTS	
Powder impulsive water jetter <i>G Atanov, Donetsk State University, Ukraine</i>	295
Development of phased intensifier for waterjet cutting <i>P Singh, D Benson, Ingersoll-Rand Waterjet Cutting Systems, USA</i>	305
High speed pumps in water jet cutting <i>J Larjola, Oy High Speed Tech Ltd, Finland</i>	319
On-line fuzzy recognition of abrasive waterjet nozzle wear <i>R Kovacevic, M Fang, University of Kentucky, USA</i>	329
Improving the competitiveness of abrasive jet cutting <i>D S Miller, BHR Group Ltd, UK</i>	347

PETROCHEM

Optimisation of the piercing or drilling mechanism of abrasive water jets 359
L Ohlsson, A Ivarson, C Magnusson, Lulea University of Technology, Sweden; J Powell, Lulea University of Technology, Sweden and Laser Expertise Ltd, UK

Steel shot entrained ultra high pressure waterjet for cutting and drilling in hard rocks 371
G Galecki, D Summers, University of Missouri-Rolla, USA

Abrasive water-jet drilling 389
O M Vestavik, Rogaland Research; E Skaugen, Rogaland University Centre, Norway

CLEANING AND SURFACE TREATMENT

Investigations on water jet processed concrete 405
A W Momber, WOMA Apparatebau GmbH, Germany

A study on peening by submerged ultra-high-speed water-jets 413
K Sato, Babcock-Hitachi KK; H Soyama, Y Yamauchi, T Ikohagi, R Oba, Tohoku University; R Oshima, Tohoku Gakuin University, Japan

Rehabilitation of the concrete pavements assisted with abrasive waterjets 425
R Kovacevic, R Mohan, J Hirscher, University of Kentucky, USA

Water jet cleaning for in-factory applications 443
A F Conn, Conn Consulting Inc, USA

The recent PREMAJET advance in cutting and derusting technology 451
B-L Liu, Huainan Mining Institute; Y Shang, H Yao, G Zhang, Huainan Coal Mining Bureau, China

Ultra-high pressure waterjet removal of thermal spray coatings 461
P J Singh, J Munoz, W L Chen, Ingersoll-Rand Waterjet Cutting Systems; W R Kratochvil, Hobart Tafa Technologies Inc, USA

MANUFACTURING

Development of an abrasive waterjet kerf cutting model for brittle materials 483
J Zeng, T J Kim, University of Rhode Island, USA

Recycling capacity of abrasives in abrasive water jet cutting 503
N S Guo, H Louis, G Meier, J Ohlsen, University of Hannover, Germany

Prediction of the geometry of the kerf created in the course of abrasive waterjet machining of ductile materials 525
Y Chung, E S Geskin, New Jersey Institute of Technology; P J Singh, Ingersoll-Rand Waterjet Cutting Systems, USA

Cutting of steam turbine components using an abrasive waterjet <i>M Kitamura, M Ishikawa, K Sudo, Y Yamaguchi, T Ishimura, Hitachi Ltd; K Tujita, Kawasaki Heavy Industries Ltd, Japan</i>	543
On the modeling of abrasive waterjet turning <i>A Ansari, Michigan Technological University; M Hashish, Quest Integrated Inc, USA</i>	555
Premixed abrasive water jets - the influence of important parameters <i>A Laurinat, H Louis, G Tebbing, University of Hannover, Germany</i>	577
Investigations of the dynamics of the surface topography formation during abrasive waterjet machining <i>J Chao, E S Geskin, Y Chung, New Jersey Institute of Technology, USA</i>	593
Three-dimensional machining with abrasive waterjets <i>M Hashish, Quest Integrated Inc (formerly Flow Research Inc), USA</i>	605
A contribution to the study of burr formation in hydro-abrasive jet machining <i>R Groppetti, Universita degli Studi di Perugia; M Monno, Politecnico di Milano, Italy</i>	621
