</table>
A model coupled heat, moisture and stress field of saturated soil during freezing
Peng Xuming, Chen Xiaobai & Wang Yaqing

Determination of unfrozen water content of an overconsolidated clay down to -160°C by
sonic approaches – Comparison with classical methods
J.Fr.Thimus, J.Aguirre-Puente & Fr.Cohen-Tenoudji

Thaw-consolidation process and calculation of frozen clayey soil
Wu Qingbai & Tong Changjiang

Water and solute migration of freezing soils in closed system under temperature gradients
Xu Xiaozu, Deng Yousheng, Gao Weiyue & Wang Fenge

Heat conduction analysis around cooled underground opening using the finite divided
element method
Yao Yi Jiu, S.Kadota, S.Koga & M.Kamata

Heat and moisture exchange for freezing and thawing grounds
Yu.S.Danielyan & P.A.Yanitsky

The law of unfrozen water content change in frozen saline (NaCl) soils
Zhang Lixin

2. Mechanical properties

Water content effect of the thawing clay soils on shear strength
G.I.Bondarenko & A.V.Sadovsky

Temperature effects on mechanical characteristics of an artificially frozen typical clay under
triaxial stress conditions
Chen Xiangsheng, Li Kun & Zhang Yunli

Strength of frozen soil under a combined stress state
Anatoly M. Fish

The progress of the method of static sounding in the investigation of geotechnical properties
of frozen soils
O.N.Isaev, V.V.Shwarev, A.V.Konstantinov, C.M.Tichomirov & A.V.Sadovsky

Mechanical properties of synthetic cometary nucleus material
H.L.Jessberger & M.Kotthaus

Experimental study of shear creep of frozen fine sand
Mi Hailhen, Wu Ziwang, Ma Wei & Xian Congde

Experimental studies on frost heaving force and adfreeze frost heaving force on short
concrete piles
Seigo Sawada & Teruyuki Suzuki

A numerical simulation of frost heave under overburden stress
Sheng Yu & Chen Xiaobai

Rheological behaviour of overconsolidated clay measured by creep test – Application to
cryogenic storage
J.Fr.Thimus, G.Henriet, P.Colin & Th.You
Development of soil fabric by freeze/thaw cycles – Its effect on frost heave
Brigitte Van Vliet-Lanoë & André Dupas

Influence of freezing-thawing on undrained triaxial compression shear behavior of fibrous peat
Hareyuki Yamaguchi, Hitoshi Ikenaga & Shinji Suzuki

Displacement and increment in earth pressure in unfrozen soil by frost heave
Hideo Yamamoto, Keiji Matsuoka, Hisao Iizuta & Takahiro Ohrai

Constitutive relations of frozen soil in uniaxial compression
Zhu Yuanlin, Zhang Jiayi, Peng Wanwei, Sheng Zhongyan & Miao Lina

3. Engineering design

Stress analysis on freezing pipes by modelling test
Cai Guangxin & Yang Weihao

Resilient modulus of freeze-thaw or resilient frost heave
M. Dysli

Towards a three-dimensional model of frost heave
J.T. Holden

Numerical case studies of ground freezing for the construction of drain pump chambers

Pressure variation on a wellbore casing during permafrost thawing
B. Ladanyi & Mu Shen

A finite element mechanical model for shaft freeze wall
Lou Genda

Elastoplastic calculation of bottom heave in artificially frozen shaft
Ma Wei & Wu Ziwang

Frozen earth cofferdam design
Joseph A. Sopko Jr, John A. Shuster & Orlando B. Andersland

The application of outer concrete lining with a foam-plastic sheet to frozen shaft and its stress analysis
Su Lifan

Deformation of ice wall in eastern air shaft, Panji No.3 Mine and its analysis
Wang Changsheng

Back analysis of measured displacements of freeze wall in shaft modelling
Weng Jiajie & Zhang Ming

The formation of heterogeneous geocryological structure while ground freezing
P.A. Yanitsky

Simulation tests and studies of tri-axial creep in frozen walls
Yu Chuhou, Yang Ping & Wang Renhe
4. Case histories

Causes and countermeasures of flooding in shafts constructed by freezing method
Chen Wenbao, Tang Zhibin & Li Gongzhou

Considerations on the choice among the different freezing methods and competitiveness of
the system as compared to alternative solutions
F.Gallavresi

Ground freezing in Yanzhou mine area
Hu Dequan & Cao Jing

Directional drilling and its application
Liu Min & Lu Jichang

Tunnel construction in the protection of a frost shell in partially saturated soil
H.Meissner & J.Vogt

The construction of East Air Shaft of Panji No. 3 Colliery by freezing method 415 m in depth
Pang Rongqing

New experience and problems with LIN ground freezing
D.Rebhan

Soil freezing for the Valencia Underground Railway work
J.L.Rojo, A.Novillo & J.R.Alocen

Shaft construction by raise boring through artificially frozen ground
A.R.Walsh, D.E.Hart & Derek Maishman

Ground freezing for driving a slope
Wu Qijian, Wang Zhengting & Zhou Xiaomin

Technical innovations in freeze shaft construction of Jining No. 2 coal mine, P.R.C.
Zhang Chonglin & Hu Dequan
