Contents

Preface ................................................................. xiii

Chapter 1 An Introduction to Tunnel Engineering ................................................. 1
Elwyn H. King and Thomas R. Kuesel
Tunnel elements 1
Details 2

Chapter 2 Tunnel Layout .................................................................................. 4
Elwyn H. King and Thomas R. Kuesel
Clearances for highway tunnels 4
Alignment and grades for highway tunnels 4
Clearances for railroad tunnels 5
Alignment and grades for railroad tunnels 5
Clearances for rapid transit tunnels 6
Alignment and grades for rapid transit tunnels 6
Controls on layout of underwater transportation tunnels 8

Chapter 3 Tunnel Surveys and Alignment Control .............................................. 13
William S. Robinson
Current state of surveying technology 13
General surveying requirements and procedures 16
Tunnel geometry 23
Survey work during construction 25
Survey for construction of immersed tubes 34
Tunnel monitoring surveys 36
Representative projects 40

Chapter 4 Geotechnical Investigations .............................................................. 46
Harvey W. Parker
Geotechnical approach to tunnel design 46
Geotechnical challenges of the underground 47
Importance of geology 48
Phasing and timing 48
Teamwork, communications, and training 50
Soil classification for tunnels 51
Rock classification 54
Description of investigation techniques 59
Developing the investigation program 65
Tunnel monitoring and instrumentation 69
Guidelines for level of geotechnical effort 69
Geotechnical Reports 74

Chapter 5 Tunnel Stabilization and Lining ......................................................... 80
Thomas R. Kuesel
Classifications 80
Principles of ground-structure interaction 84
Design considerations 86
Lining behavior under ground loads 87
Performance criteria for flexible ring design 87
Behavior of two-stage linings 89
Lining analysis 90
Behavior of rock reinforcement systems 91

### Chapter 11 Tunnel Boring Machines

*Harry Surcliffe*

- Historical development 203
- Excavation under external water pressure 205
- Components of a modern TBM 205
- Operation of the TBM 207
- The TBM, temporary support, and permanent lining 209
- The decision to use a TBM 209
- Selecting a soft ground TBM 210
- Measuring TBM performance 210
- The learning curve 212
- Variability in ground 213
- Noncircular tunnels 214

### Chapter 12 Shotcrete

*Elwyn H. King*

- History 220
- Quality assurance 223
- Materials 223
- Engineering properties 225
- Wet or dry? 226
- Preparation, mix, shoot, and cure 227
- Testing 228
- Design considerations 229

### Chapter 13 Materials Handling and Construction Plant

*A. A. Mathews*

- Basic transportation systems 231
- Special muck transporting systems 239
- Supplemental material handling systems 244
- Vertical transport 248
- Hoisting 252
- Vertical conveyors 254
- Utilities 255
- Surface plant 262
- Concrete plant 264
- Shotcrete plant 266

### Chapter 14 Immersed Tube Tunnels

*Ahmet Gursoy*

- General description 268
- Conceptual considerations 269
- Steel shell tubes 273
- Concrete tubes 279
- Weight control of tubes 280
- Preparation of trench 281
- Tube foundations 282
- Joints between tubes 285
- Backfill 289
- Design of tubes 289

### Chapter 15 Water Conveyance Tunnels

*David E. Westfall*

- Friction losses 298
- Drop shafts for vertical conveyance 298
- Air removal 302
- Gas buildups in sewer tunnels 304
Contents

Control of infiltration and exfiltration 304
Lake taps and connections to live tunnels 308
Tunnel maintenance 309

Chapter 16 Small-Diameter Tunnels ............................................. 311
David E. Westfall and Glenn M. Boyce
Basic procedure 311
Site investigations 311
Pits and shafts 313
Leading edge 314
Jackings pipes 316
Applications 318

Chapter 17 Cut-and-Cover Tunnel Structures .................................. 320
James L. Wilton
Tunnel design—structural 322
Shoring systems 329
Common types of shoring walls 329
Common types of shoring wall support 332
Design of shoring systems 335
Performance of shoring systems 346
Decking 348
Excavation and groundwater control 349
Permanent shoring walls and support 352
Reinforced concrete materials and construction 353
Watertightness 357

Chapter 18 Safety Provisions ...................................................... 360
Robert J. Jenny
General safety rules 360
Localized operational hazards 361
First aid station 362
Fire hazards 363
Ventilation during construction 363
Handling and storage of explosives 364
Inactive headings 364
Compressed-air work 364
Decompression table explanation 367

Chapter 19 Fire Life Safety ....................................................... 369
Norman H. Danziger
Background 369
BART 369
Highway tunnels 372
Rapid transit tunnels 378
Mainline railroad tunnels 381
Fire suppression systems 382
Sprinkler systems 382

Chapter 20 Tunnel Ventilation ................................................... 384
Arthur G. Bendelius
Highway tunnels 384
Railroad tunnels 406
Rapid transit systems 414
Simulation 421
Test program 422
Equipment and facilities 424
Control and monitoring systems 435
Ventilation during construction 436
Chapter 21  Tunnel Lighting  ......................................................... 439
Peter A. Mowczan
Lighting of highway tunnels  439
Definition of terms  439
Tunnel lighting nomenclature  440
Tunnel classification  441
Physiological considerations in tunnel lighting design  441
Entrance lighting  443
Luminance level in the tunnel interior  444
Exit lighting  445
Lighting of short tunnels  445
Lighting of long tunnels  446
Tunnel lining  451
Tunnel lighting luminaires  451
Maintenance  452
Emergency lighting  453
Lighting of transit tunnels  453
Lighting of railway tunnels  453
Design computations  454

Chapter 22  Power Supply and Distribution  .................................. 455
Elies Elvoe
Peculiar electrical requirements of tunnels  455
Types of tunnels  456
Electrical loads  456
Lighting load  456
Power load  457
Tunnel ventilation fan load  457
Miscellaneous loads  457
Voltage selection  457
Distribution voltage  458
Primary distribution systems  458
Service bus arrangements  459
Secondary distribution system  460
Standby power supply  460
Uninterruptible power systems (UPS)  461
Standby power distribution system  461
Supervisory control and data acquisition (SCADA)  461
Data transmission system (DTS)  462
Auxiliary systems  462
Grounding and bonding  462
System grounding  462
Equipment grounding  462
Grounding electrodes  463
Stray current and cathodic protection  463
Raceway systems  463
Design  463
Materials  463
Major equipment  464

Chapter 23  Water Supply and Drainage Systems  ........................... 467
Arthur G. Bendelius
Water supply system  467
Water supply design criteria  467
Water source  467
Water mains  468
Hose stations  470
Protection of exhaust fans  470
Fire pumps  471
Drainage system  473
Drainage design criteria  474
Open approach drainage 475
Tunnel drainage 476
Drainage pump stations 476
Drainage pumps 477
Water treatment 480
Flood protection 481
Drainage of rail tunnels 482

Chapter 24 Surveillance and Control Systems for Highway Tunnels .................................. 485
Richard J. Naish
Survey and control systems 485
Overview of available technology 485
Traffic control concepts 487
Field hardware 490
Control center 493
System selection 496
Design and implementation 496
Operation and maintenance 497

Chapter 25 Tunnel Finish .................................................. 499
Stanley Lorch
Suspended ceiling systems 500
Ceiling veneers 504
Tunnel sidewall finishes 505
Sidewalks 506
Equipment niches and doors 508
Roadway design 508
Tunnel finish materials 508

Chapter 26 Service Buildings and Ancillary Spaces ............................................... 512
Stanley Lorch and Hanan Rivett
Ventilation buildings for ducted tunnels 512
Program requirements 514
Underground rail transit stations 517

Chapter 27 Tunnel Rehabilitation ........................................ 520
Henry A. Russell
Tunnel rehabilitation inspection methods 520
Tunnel rehabilitation repairs 528
Concrete repair 528
Crack repair 534
Metal repairs 536
Brick masonry repair 537
Segmental tunnel liners 537
Construction costs 538

Chapter 28 Tunnel Construction Contracting ............................................. 541
Thomas R. Kuesel
Differing site conditions clause 542
