Predictive soil mechanics

Proceedings of the Wroth Memorial Symposium
held at St Catherine's College, Oxford,
27-29 July 1992

Edited by G. T. Houlsby and A. N. Schofield

Thomas Telford, London
Contents

Theme report: The key material properties in geotechnical engineering need to be measured, instead of being specified. J. GRAHAM 1

Theme report: Soil properties and their measurement. C. SAGASETA 19

Theme report: Design methods. M. D. BOLTON 50

Field, in situ and laboratory consolidation parameters of a very soft clay. M. S. S. ALMEIDA and C. A. M. FERREIRA 73

Post-liquefaction settlement of sands. K. ARULANANDAN and J. SYBICO 94

A note on modelling small strain stiffness in Cam clay. J. H. ATkinson 111

Towards systematic CPT interpretation. K. BEEN and M. G. JEFFERIES 121

Determining lateral stress in soft clays. J. BENOIT and A. J. LUTENEGGER 135

The interpretation of self-boring pressuremeter tests to produce design parameters. B. G. CLARKE 156

An assessment of seismic tomography for determining ground geometry and stiffness. C. R. I. CLAYTON, M. J. GUNN and V. S. HOPE 173

The behaviour of granular soils at elevated stresses. M. R. COOP and I. K. LEE 186
PREDICTIVE SOIL MECHANICS

Geotechnical characterisation of gravelly soils at Messina site: selected topics. R. CROVA, M. JAMIOLKOWSKI, R. LANCELLOTTA and D. C. F. LO PRESTI

A critical state constitutive model for anisotropic soil. M. C. R. DAVIES and T. A. NEWSON

The bearing capacity of conical footings on sand in relation to the behaviour of spudcan footings of jackups. E. T. R. DEAN, R. G. JAMES, A. N. SCHOFIELD, F. S. C. TAN and Y. TSUKAMOTO

Co-rotational solution in simple shear test. G. DE JOSSELIN DE JONG

Parameter selection for pile design in calcareous sediments. M. FAHEY, R. J. JEWELL, M. F. RANDOLPH and M. S. KHORSHID

Mobilisation of stresses in deep excavations: the use of earth pressure cells at Sheung Wan Crossover. R. A. FRASER

Consolidation of an accreting clay layer: solutions via the wave equation. R. E. GIBSON

The prediction of surface settlement profiles due to tunnelling. M. J. GUNN

Modelling of the behaviour of foundations of jack-up units on clay. G. T. HOULSBY and C. M. MARTIN

Development of the cone pressuremeter. G. T. HOULSBY and N. R. F. NUTT

Predicting the effect of boundary forces on the behaviour of reinforced soil walls. R. A. JEWELL, H. J. BURD and G. W. E. MILLIGAN

Some thoughts on the evaluation of undrained shear strength for design. F. H. KULHAWY

PREDICTIVE SOIL MECHANICS

Stability of shallow tunnels in soft ground. S. W. SLOAN and A. ASSADI

Sliding resistance for foundations on clay till. J. S. STEENFELT

Sampling disturbance with particular reference to its effect on stiff clays. P. R. VAUGHAN, R. J. CHANDLER, J. M. APTED, W. M. MAGUIRE and S. S. SANDRONI

Development and application of a critical state model for unsaturated soil. S. J. WHEELER and V. SIVAKUMAR

Predicting earthquake-caused permanent deformations of earth structures. R. V. WHITMAN

The effects of installation disturbance on interpretation of in situ tests in clay. A. J. WHITTLE and C. P. AUBENY

Shear modulus and strain excursion in the pressuremeter test. R. W. WHITTLE, J. C. P. DALTON and P. G. HAWKINS

Analysis of the dilatometer test in undrained clay. H. S. YU, J. P. CARTER and J. R. BOOKER

Predictions associated with the pile downdrag study at the SERC soft clay site at Bothkennar, Scotland. J. A. LITTLE and K. IBRAHIM

Recollections from the Wroth Memorial Symposium: Predictive Soil Mechanics. S. E. STALLEBRASS, S. M. SPRINGMAN and J. P. LOVE
