# Table of Contents

*Preface and Acknowledgements*

1 **Design preliminaries**
   1.1 Introduction 1
   1.2 Assessment of information 2
   1.3 Preliminary identification of species 2
   1.4 Consideration of specific constraints 4
   1.5 Consideration of performance requirements 5
   1.6 Approach to design 6
      1.6.1 Programming 8
      1.6.2 Interpretation and use of supporting information 9
         1.6.2.1 Design Brief 9
         1.6.2.2 Performance specification and Employer’s Requirements 12
         1.6.2.3 Site investigations 13
         1.6.2.4 Feasibility study and scheme plan 14
         1.6.2.5 Legal obligations 16
   1.7 Additional testing and investigations 19
   1.8 Costs, confidence and the proactive approach 22
   1.9 Chapter summary 25

2 **Essential legislation** 28
   2.1 Introduction 28
   2.2 Town and Country Planning Act 1990 29
   2.3 Highways Act 1980 29
   2.4 Water Industry Act 1991 35
   2.5 Water Resources Act 1991 36
   2.6 Water Act 1989 38
   2.7 Party Wall etc. Act 1996 38
   2.8 Environment Act 1995 41
   2.9 Environment Protection Act 1990 44
   2.10 Construction (Design and Management) Regulations 1994 44

3 **Consultations and agreements** 48
   3.1 Introduction 48
3.2 Environment Agency
3.3 Water and Sewerage Undertakers
  3.3.1 Adoption of sewers
  3.3.2 Sewer requisitions
  3.3.3 Sewer diversions
  3.3.4 Trade effluent consents
3.4 Planning authority
3.5 Highway authority
3.6 Building control
3.7 Utilities and statutory undertakers
3.8 Police and emergency services
3.9 Others

4 Environmental issues
4.1 Introduction
4.2 Planning stage
4.3 Construction and waste materials
4.4 Site hazards
4.5 Water and land drainage
4.6 Contaminated land

5 Drainage design
5.1 Introduction
5.2 Terminology
5.3 Layout of sewers
5.4 Hydraulic design
  5.4.1 Flow and energy losses
  5.4.2 Part full pipes
  5.4.3 Channels
5.5 Structures of the sewerage system
  5.5.1 Pumping stations
  5.5.2 Pump tyres
    5.5.2.1 Roto-dynamic pumps
      5.5.2.1.1 Axial flow pumps
      5.5.2.1.2 Centrifugal
      5.5.2.1.3 Mixed flow pumps
5.5.2.2 Positive displacement pumps
  5.5.2.2.1 Air lift pumps
  5.5.2.2.2 Piston pumps
  5.5.2.2.3 Rotary pumps
  5.5.2.2.4 Archimedean screw
5.5.3 Pumping mains
  5.5.3.1 Hydraulic design and economics
  5.5.3.2 Surge protection
5.5.4 Tidal, estuarine and river outfalls
5.5.5 Manholes
5.5.6 Gravity sewers
5.5.7 Inverted syphons
5.5.8 Flushing chambers
5.5.9 Storm water overflows

6 Surface water drainage
  6.1 Introduction
  6.2 Surface water sewage
  6.3 Design practice
    6.3.1 Area to be drained
    6.3.2 Catchment characteristics
    6.3.3 Consideration of future development
    6.3.4 Rainfall statistics
  6.4 Determination of the design storm
  6.5 Evaluation of surface run-off
    6.5.1 Retention
    6.5.2 Impermeability and infiltration characteristics
    6.5.3 Conveyance to sewers
  6.6 Calculating the rate of run-off
    6.6.1 Rational method
      6.6.1.1 Application of the rational method
    6.6.2 TRRL hydrograph method
      6.6.2.1 Principles of the hydrograph method
      6.6.2.2 The TRRL hydrograph method in practice
  6.7 Surface water drainage and pollution
  6.8 Sustainable Urban Drainage Systems (SUDS)
    6.8.1 Source control
9.2.7.3 Pipe-reaming 211
9.2.7.4 Pipe-eating 212

10 Pipe laying and materials 213
10.1 Introduction 213
10.2 Pipelaying practice 213
10.3 Pipe bedding and sidefill materials 215
10.4 Trenchless technology 218
  10.4.1 Pipejacking and microtunnelling 219
  10.4.2 Directional drilling and guided boring 222
  10.4.3 Impact moling and pipe ramming 223
10.5 Pipe materials 224

11 Roads 226
11.1 Introduction 226
11.2 Pavement design 228
11.3 Preparation and construction 229
11.4 Capping and sub-base layers 231
  11.4.1 Subgrade improvement and sub-bases 233
  11.4.2 Cement/lime stabilisation 233
  11.4.3 Alternative materials 235
    11.4.3.1 Burnt colliery spoil 235
    11.4.3.2 China clay waste 236
    11.4.3.3 Power station waste 236
    11.4.3.4 Blast furnace slag 237
    11.4.3.5 Slate waste 237
    11.4.3.6 Construction and demolition waste 237
    11.4.3.7 Spent oil shale 237
    11.4.3.8 Incinerator ash 238
11.5 Flexible construction 238
  11.5.1 Sub-base 238
  11.5.2 Roadbase 239
  11.5.3 Basecourse 239
  11.5.4 Wearing course 239
11.6 Flexible composite construction 239
11.7 Rigid construction 240
11.8 Rigid composite construction 241
### 11.9 Pavement materials and their properties

<table>
<thead>

<td>13.2 Surface dressing</td>
<td>261</td>
</tr>
<tr>
<td>13.2.1 Assessment of design parameters</td>
<td>261</td>
</tr>
</tbody>
</table>
13.2.1.1 Traffic category 262
13.2.1.2 Hardness of old surface 262
13.2.1.3 Skidding resistance requirements 262
13.2.1.4 Time of laying 263
13.2.2 Selection of aggregates, chippings and binders 263
13.2.3 Site preparation, application & traffic management 264
13.2.4 Applications of surface dressing 266
13.3 Thin surfacings 267
13.4 Retexturing 267
13.5 Milling (planing) and regulating an existing surface 268
13.6 Overlays 268
13.7 Road recycling 269
13.7.1 In-situ recycling 269
13.7.2 Central plant recycling 270
13.8 Pavement assessment 270
13.8.1 High speed road monitor 270
13.8.2 Visual inspection 271
13.8.3 Deflection testing 271
13.8.3.1 Deflection beam 272
13.8.3.2 Deflectograph 272
13.8.4 Ground penetrating radar 272
13.9 Surface treatment of rigid pavements 273
13.9.1 Surface dressing 273
13.9.2 Thin bonded surface repairs 274
13.9.3 Mechanical roughening 274
13.9.4 Transverse grooving 275
13.9.5 Joint repairs 275
13.9.6 Defects in rigid pavements 275
13.10 Summary of surfacing performance 278

14 Road design 279
14.1 General design practice 279
14.1.1 Trunk roads and major highways schemes 279
14.1.2 Residential/industrial estate roads 280
14.1.3 Private roads 281
14.2 Commonly identified highway design problems 282
14.3 General highway design parameters 284
