**KEYNOTE LECTURES**

- The James K. Mitchell Lecture: "*In situ* soil testing: from mechanics to interpretation"  
  H-S. Yu  
  Page 3
- Characterization of granite and the underground construction in Metro do Porto, Portugal  
  S. Babendererde, E. Hoek, P. Marinos & A. Silva Cardoso  
  Page 39
- *In-situ* test characterization of unusual geomaterials  
  F. Schnaid, B.M. Lehane & M. Fahey  
  Page 49
- Routine and advanced analysis of mechanical *in-situ* tests.  
  Results on saprolitic soils from granites more or less mixed in Portugal  
  A. Gomes Correia, A. Viana da Fonseca & M. Gambin  
  Page 75
- The contributions of *in situ* geophysical measurements to solving geotechnical engineering problems  
  Page 97
- Deformation properties of fine-grained soils from seismic tests  
  K.R. Massarsch  
  Page 133
- Advanced calibration chambers for cone penetration testing in cohesionless soils  
  A-B. Huang & H-H. Hsu  
  Page 147
- *In-situ* seismic survey in characterizing engineering properties of natural ground  
  S. Shibuya, S. Yamashita, Y. Watabe & D.C.F. Lo Presti  
  Page 167
- Characterization of the Venice lagoon silts from *in-situ* tests and the performance of a test embankment  
  P. Simonini  
  Page 187
- Characterization of soft sediments for offshore applications  
  M.F. Randolph  
  Page 209
- Evaluating soil liquefaction and post-earthquake deformations using the CPT  
  P.K. Robertson  
  Page 233
1. **MECHANICAL IN-SITU TESTING METHODS**

General report: Mechanical in-situ testing methods
M. Devincenzi, J.J.M. Powell & N. Cruz

Comparison between plate load test results and dilatometer test results - Case study, Seymareh dam and Szabo dam projects
A. Agharazi & M. Moradi

Influence of vane size and equipment on the results of field vane tests
H. Åhnberg, R. Larsson & C. Berglund

Determination of in-situ deformation moduli with a penetrometer and static loading test
H. Arbaoui, R. Gourvès, Ph. Bressolette & L. Bodé

Characterization of soft marine clay using the flat dilatometer
A. Arulrajah, M.W. Bo & H. Nikraz

Estimating the SPT penetration resistance from rod penetration based on instrumentation

Characterization of SPT grain size effects in gravels
C.R. Daniel, J.A. Howe, R.G. Campanella & A. Sy

International and European standards on geotechnical investigation and testing for site characterization
V. Eitner, R. Katzenbach & F. Stölbchen

CPTU site characterization: offshore peninsular and East Malaysia experience
S.M. Fairuz, J. Rohani & T. Lunne

The repeatability in results of Mackintosh Probe test
A. Fakher & M. Khodaparast

Application of the CPT to the characterization of a residual clay site
S.G. Fityus & L. Bates

Energy ratio measurement of SPT equipment
D-S. Kim, W-S. Seo, E-S. Bang

CPT-DMT interrelationships in Piedmont residuum
P.W. Mayne & T. Liao

Energy measurements for standard penetration tests and the effects of the length of rods.
E. Odebrecht, F. Schnaid, M.M. Rocha & G.P. Bernardes

SPT-T: test procedure and applications
A.S.P. Peixoto, D. de Carvalho & H.L. Giachetti

Dynamic cone penetrometer to estimate subgrade resilient modulus for low volume roads design
A.M. Rahim & K.P. George

Soil profile interpretation based on similarity concept for CPTU data
F. Saboya Jr & D.J.G. Balbi

Centrifuge penetration tests in saturated layered sands
M.F. Silva & M.D. Bolton

Sampling by drilling and excavations and groundwater measurements according to
EN ISO 22475 for geotechnical investigations and site characterization
F. Stölbchen, V. Eitner & H. Hoffmann

Undrained shear strength and OCR of marine clays from piezocone test results
F.A. Trevor & P.W. Mayne

Results of a comparative study on cone resistance measurements
V. Whenhams, N. Haybrechts, M. De Vos, J. Maertens, G. Simon & G. Van Alboom
2. **Geophysical Methods Applied to Geotechnical Engineering**

General report: Geophysical methods applied to geotechnical engineering
S. Foti & A.P. Butcher

ISC’2 experimental site investigation and characterization - Part 2:
from SH waves high resolution shallow reflection to shallower GPR tests
F. Almeida, H. Hermosilh, J.M. Carvalho, A. Viana da Fonseca & R. Moura

Quantitative resistivity methods for marine and fluvial site investigations
P. Brabers

ISC’2 experimental site investigation - Part 1: conventional and tomographic P and S waves refraction seismics vs. electrical resistivity
J.M. Carvalho, A. Viana da Fonseca, F. Almeida & H. Hermosilh

The role of crosshole seismic tomography for site characterization and grout injection evaluation on Carmo convent foundations
M.J. Coelho, F.M. Salgado & L. Fialho Rodrigues

Geophysical characterization for seepage potential assessment along the embankments of the Po River
C. Comina, S. Foti, L.V. Socco & C. Strobbia

The use of multichannel analysis of surface waves in determining $G_m$, for soft clay
S. Donohue, M. Long, K. Gavin & P. O’Connor

The use of electrical resistivity for detection of leachate plumes in waste disposal sites

Wavelets in surface wave cavity detection - theoretical background and implementation
N. Gucunski, P. Shokouhi & A. Maher

Investigation of bridge foundation sites in karst terrain via multi-electrode electrical resistivity
D.R. Hiltunen & M.J.S. Roth

Monitoring water saturation gradient in a silty sand site using geophysical techniques
E. Kalantarian & D. Doser

Characterizing ground hazards induced by historic salt mining using ground-penetrating radar
B. Kulessa, A. Ruffell & D. Glynn

Hydrogeological characterization by electrical resistivity surveys in granitic terrains
A.S. Lima & A.C.V. Oliveira

Development of a TDR dielectric penetrometer
C-P. Lin, C-C. Chung & S-H. Tang

Joint acquisition of SWM and other seismic techniques in the ISC’2 experimental site
I. Lopes, I. Moitinho, C. Strobbia, P. Teves-Costa, G.P. Deidda, M. Mendes & J.A. Santos

Decomposed rock mass characterization with crosshole seismic tomography at the Heroismo station site (Porto)
M. Oliveira & M.J. Coelho

Shear velocity model appraisal in shallow surface wave inversion
A. O’Neill

Full waveform reflectivity for inversion of surface wave dispersion in shallow site investigations
A. O’Neill

Offshore geosciences for coastal infrastructure
J. Peuchen & W.M. NeSmith

A framework for inversion of wavefield spectra in seismic non-destructive testing of pavements
N. Ryden, P. Ulriksen & C.B. Park

Proceedings ISC’2 on Geotechnical and Geophysical Site Characterization, Viana da Fonseca & Mayne (eds.)
1. MECHANICAL IN-SITU TESTING METHODS

General report: Mechanical in-situ testing methods
M. DeVincenzi, J.J.M. Powell & N. Cruz

Comparison between plate load test results and dilatometer test results - Case study, Seymareh dam and Sazbon dam projects
A. Agharazi & M. Moradi

Influence of vane size and equipment on the results of field vane tests
H. Åhnberg, R. Larsson & C. Berglund

Determination of in-situ deformation moduli with a penetrometer and static loading test
H. Arbaoui, R. Gourvès, Ph. Bressolette & L. Bodé

Characterization of soft marine clay using the flat dilatometer
A. Arulrajah, M.W. Bo & H. Nikraz

Estimating the SPT penetration resistance from rod penetration based on instrumentation

Characterization of SPT grain size effects in gravels
C.R. Daniel, J.A. Howie, R.G. Campanella & A. Sy

International and European standards on geotechnical investigation and testing for site characterization
V. Eitner, R. Katzenbach & F. Stöben

CPTU site characterization: offshore peninsular and East Malaysia experience
S.M. Fairuz, J. Rohani & T. Lunne

The repeatability in results of Mackintosh Probe test
A. Fakher & M. Khodaparast

Application of the CPT to the characterization of a residual clay site
S.G. Fityus & L. Bates

Energy ratio measurement of SPT equipment
D-S. Kim, W-S. Seo, E-S. Bang

CPT-DMT interrelationships in Piedmont residuum
P.W. Mayne & T. Liao

Energy measurements for standard penetration tests and the effects of the length of rods.
E. Odebrecht, F. Schnaid, M.M. Rocha & G.P. Bernardes

SPT-T: test procedure and applications
A.S.P. Peixoto, D. de Carvalho & H.L. Giachetti

Dynamic cone penetrometer to estimate subgrade resilient modulus for low volume roads design
A.M. Rahim & K.P. George

Soil profile interpretation based on similarity concept for CPTU data
F. Saboya Jr & D.J.G. Balbi

Centrifugue penetration tests in saturated layered sands
M.F. Silva & M.D. Bolton

Sampling by drilling and excavations and groundwater measurements according to
EN ISO 22475 for geotechnical investigations and site characterization
F. Stöben, V. Eitner & H. Hoffmann

Undrained shear strength and OCR of marine clays from piezocone test results
F.A. Trevor & P.W. Mayne

Results of a comparative study on cone resistance measurements
V. Whenham, N. Huybrechts, M. De Vos, J. Maertens, G. Simon & G. Van Alboom
GEOPHYSICAL METHODS APPLIED TO GEOTECHNICAL ENGINEERING

General report: Geophysical methods applied to geotechnical engineering 409
S. Foti & A.P. Butcher

ISC’2 experimental site investigation and characterization - Part 2:
from SH waves high resolution shallow reflection to shallower GPR tests
F. Almeida, H. Hermosilh, J.M. Carvalho, A. Viana da Fonseca & R. Moura

Quantitative resistivity methods for marine and fluvial site investigations 427
P. Brabers

ISC’2 experimental site investigation - Part 1: conventional and tomographic P and
S waves refraction seismics vs. electrical resistivity
J.M. Carvalho, A. Viana da Fonseca, F. Almeida & H. Hermosilha

The role of crosshole seismic tomography for site characterization and grout injection evaluation
on Carmo convent foundations
M.J. Coelho, F.M. Salgado & L. Fialho Rodrigues

Geophysical characterization for seepage potential assessment along the embankments of the Po River 451
C. Comina, S. Foti, L.V. Socco & C. Strobbia

The use of multichannel analysis of surface waves in determining G
for soft clay
S. Donohue, M. Long, K. Gavin & P. O’Connor

The use of electrical resistivity for detection of leachate plumes in waste disposal sites 467

Wavelets in surface wave cavity detection - theoretical background and implementation 475
N. Guconski, P. Shokouhi & A. Maher

Investigation of bridge foundation sites in karst terrane via multi-electrode electrical resistivity 483
D.R. Hiltunen & M.J.S. Roth

Monitoring water saturation gradient in a silty sand site using geophysical techniques 491
E. Kalantarian & D. Doser

Characterizing ground hazards induced by historic salt mining using ground-penetrating radar 497
B. Kulessa, A. Ruffell & D. Glynn

Hydrogeological characterization by electrical resistivity surveys in granitic terrains 505
A.S. Lima & A.C.V. Oliveira

Development of a TDR dielectric penetrometer 513
C-P. Lin, C-C. Chung & S-H. Tang

Joint acquisition of SWM and other seismic techniques in the ISC’2 experimental site 521
I. Lopes, I. Moitinho, C. Strobbia, P. Teves-Costa, G.P. Deidda, M. Mendes & J.A. Santos

Decomposed rock mass characterization with crosshole seismic tomography at the Heroísmo
station site (Porto)
M. Oliveira & M.J. Coelho

Shear velocity model appraisal in shallow surface wave inversion 539
A. O’Neill

Full waveform reflectivity for inversion of surface wave dispersion in shallow site investigations 547
A. O’Neill

Offshore geosciences for coastal infrastructure 555
J. Peuchen & W.M. NeSmith

A framework for inversion of waveform spectra in seismic non-destructive testing of pavements 563
N. Ryden, P. Ulriksen & C.B. Park

Proceedings ISC’2 on Geotechnical and Geophysical Site Characterization, Viana da Fonseca & Mayne (eds.) IX
Geoelectrical resistivity imaging of domestic waste disposal sites: Malaysian case study
The small strain stiffness of gold tailings
M. Theron, G. Heymann & C.R.I. Clayton
An assessment of heavy metal contamination using electromagnetic survey in the solid waste disposal site of Campos dos Goytacazes, Brazil
Geotechnical site characterization using surface waves, case studies from Belgium and the Netherlands
V. van Hoegaerden, R.S. Westerhoff, J.H. Brouwer & M.C. van der Rijst
Geophysical methods and identification of embankment dam parameters
Application of advanced geophysical technologies to landslides and unstable slopes
R.J. Whiteley
Resistivity imaging as a tool in shallow site investigation – a case study
R. Wisén, T. Dahlin & E. Auken
Evaluation of grouting effect with seismic tomography considering grouting mechanism
Y. Yamaguchi & H. Satoh

3. INNOVATIVE TECHNOLOGIES AND EQUIPMENT

General report: Innovative technologies and equipment
M. Long & K.K. Phoon
The use of microtremors for soil and site categorization in Thessaloniki city, Greece
P. Apostolidis, D. Raptakis, M. Manakou & K. Pitiakis
New de-coupled shear wave source for the SCPT test
L. Areias, W. Haegeman & W.F. Van Impe
Comparing 360° televising of drill hole walls with core logging
Developments of a full displacement pressuremeter for municipal solid waste site investigations in Brazil
Rock characterization using drilling parameters
J. Benoit, S.S. Sadkowski & W.A. Bothner
Penetration resistance in soft clay for different shaped penetrometers
S.F. Chung & M.F. Randolph
Evaluation of the undrained shear strength profile in soft layered clay using full-flow probes
Rapid site assessment with the electrical conductivity probe flexible approach for rapid and deep site investigation
M.P. Harkes, E.E. van der Hoek & J.J. van Meerten
A framework for using textured friction sleeves at sites traditionally problematic for CPT
G.L. Hebeler, J.D. Frost & J.D. Shinn II
Thin layer and interface characterization by VisCPT
R.D. Hryciw & S. Shin
Evaluation of shear wave velocity profile using SPT based uphole test
D-S. Kim, E-S. Bang, W-S. Seo

© 2004 Millpress, Rotterdam, ISBN 90 5966 009 9
Suitability of using Iwasaki's P, in characterization of liquefaction damages during the 1999 Chi-Chi Earthquake, Taiwan
C.P. Kuo, M. Chang, S.H. Shau & R.E. Hsu

T-bar testing in Irish soils
M. Long & G.T. Gudjonsson

Site characterization and QA/QC of deep dynamic compaction using an instrumented dilatometer
H.J. Miller, K.P. Stetson & J. Benoît

Soil-rock sounding with MWD – a modern technique to investigate hard soils and rocks
B. Möller, U. Bergdahl & K. Elmgren

A new in-situ apparatus: the geomechanometer
J. Monnet & S.M. Senouci

Permeability of sand sediment soil determined by the pressure infiltrometer test
T. Morii, Y. Takeshita & M. Inoue

Adapted T-bar penetrometer versus CPT to determine undrained shear strengths of Dutch soft soils
O. Oung, J.W.G. Van der Veg, L. Tiggelman & H.E. Brasinga

Development of seismic site characterization method using harmonic wavelet analysis of wave (HWAW) method
H-C. Park & D-S. Kim

Use of dilatometer and dual dilatometer test for soft soils and peats
P.P. Rahardjo, Y. Halim & L. Sentosa

Field evaluation of the LCPC in-situ triaxial test
Ph. Reiffsteck

CPTWD (Cone Penetration Test While Drilling) a new method for deep geotechnical surveys
M. Sacchetto, A. Trevisan, K. Elmgren & K. Melander

Enhanced access penetration system: a direct push system for difficult site conditions
J.D. Shinn II & J.W. Haas III

Use of a radioisotope cone to characterize a lumpy fill
T.S. Tan, M. Karthikeyan, K.K. Phoon, G.R. Dasari & M. Mimura

Development of a carrier tool for a multi-method investigation of brownfield sites
P. Wotschke & S. Friedel

4. **NEW DEVELOPMENTS IN INTERPRETATION OF IN-SITU DATA**

General report: New developments in the interpretation of in-situ test data
B. Lehane & M. Fahey

Discussion report: Benefit of new developments in interpretation of in-situ data
J. Peuchen

Calibration chamber size and boundary effects for CPT q, measurements
M.M. Ahmadi & P.K. Robertson

State-space seismic cone minimum variance deconvolution
E.J. Baziw

The effects of vibration on the penetration resistance and pore water pressure in sands
J. Bonita, J.K. Mitchell & T.L. Brandon

**In-situ testing and foundation engineering: recent contributions**
J-L. Briaud

---

Proceedings ISC'2 on Geotechnical and Geophysical Site Characterization, Viana da Fonseca & Mayne (eds.) XI
Disturbance effects of field vane tests in a varved clay
A.B. Cerato & A.J. Lutenegger

Assessment of cyclic stability of cohesive deposits using cone penetration
R. Debasis

High resolution stratigraphic and sedimentological analysis of Llobregat delta nearby Barcelona from CPT & CPTU tests
M.J. Devincenzi, S. Colàs, I.L. Casamor, M. Canals, O. Falivene & P. Busquets

Fractal analysis of CPT data
J.A. Díaz-Rodríguez & P. Moreno-Carrizales

Neural networks in soil characterization
W. Ding & J.Q. Shang

Cylindrical cavity expansion modeling for interpretation of cone penetration tests
F. Elmí & J.L. Favre

Stratigraphic profiling by cluster analysis and fuzzy soil classification from mechanical cone penetration tests
J. Facciorusso & M. Uzielli

Site variability, risk, and beta
R.A. Failmezger, P.J. Bullock & R.L. Handy

A case study using in-situ testing to develop soil parameters for finite-element analyses
E. Farouz, J-Y. Chen & R.A. Failmezger

Using a non linear constitutive law to compare Menard PMT and PLT E-moduli
A. Gomes Correia, A. Antão & M. Gambin

Computational and physical basis for dynamic characterization using Love waves
B.B. Guzina, A.I. Madyarov & R.H. Osburn

Effect of ageing on shear wave velocity by seismic cone
J.A. Howie & A. Amini

Dissipation test evaluation with a point-symmetrical consolidation model
E. Imre & P. Rózsa

Feasibility of neural network application for determination of undrained shear strength of clay from piezocone measurements
Y.S. Kim

Measurement of in-situ deformability in hard rock
D. Labrie, B. Conlon, T. Anderson & R.F. Boyle

Estimation of shear strength increase beneath embankments by seismic cross-hole tomography
R. Larsson & H. Mattson

Statistical evaluation of the dependence of the liquidity index and undrained shear strength of CPTU parameters in cohesive soils
J. Liszkowski, M. Tschuschke, Z. Mlynarek & W. Tschuschke

CPTU – replication test in post flotation sediments
Z. Mlynarek, W. Tschuschke & T. Lunne

Evaluation of the coefficient of subgrade reaction for design of multipropped diaphragm walls from DMT moduli
P. Monaco & S. Marchetti

Evaluation of SCPTU intra-correlations at sand sites in the Lower Mississippi River Valley, USA
J.A. Schneider, A.V. McGillivray & P.W. Mayne
