IRRIGATION
THEORY AND PRACTICE

Proceedings of the International Conference
held at the University of Southampton 12–15 September, 1989

Editors:
J.R. Rydzewski
and
C.F. Ward

The Institute of Irrigation Studies
Department of Civil Engineering
University of Southampton

PENTECH PRESS
LONDON
## CONTENTS

1. CURRENT POLICY - CRITICAL REVIEW

2. CURRENT PRACTICE - PROJECT REVIEWS

2.1 Canal Irrigation in Pakistan.  
M A Chohan, Government of the Punjab Irrigation and  
Power Department, Lahore, Pakistan.

2.2 Problems in Planning of Irrigation Projects in Iran.  
Md. Bybordi, Plan & Budget Ministry, Tehran, Iran.

2.3 Management and Operation of Irrigation Projects in  
China.  
Liu Zhaoyi, Wuhan University of Hydraulic and Electric  
Engineering, Peoples Republic of China.

2.4 An Introspection of Bangladesh Irrigation Management.  
M R Biswas, Bangladesh Agricultural University,  
Mymensingh, Bangladesh.

2.5 Ex-post Evaluation of the Lower Seyhan Project in  
Turkey.  
O Tekinel, A Yazar, B Çevik and R Kanber, University of  
Çukurova, Adana, Turkey.

2.6 Performance Evaluation of a Protective Irrigation  
Project: the case of Tungabhadra Project in India.  
M Satyanarayana and D Srivastava, Indian Agricultural  
Research Institute, New Delhi, India.

2.7 A Successful Irrigation-Drainage Project: West-East  
Lake Polder area.  
Xu Zhifang, Wuhan University of Hydraulic and Electric  
Engineering, Peoples Republic of China.

2.8 Smallholder Irrigation Schemes in Sub-Saharan Africa: a  
government’s role in their development.  
N C Portch, Sir William Halcrow & Partners, U.K.

2.9 Aspects of Small Scale Irrigation in the Southern  
African Region.  

2.10 Small Scale Irrigation in Ethiopia.  
I McA Anderson, Anderson Irrigation and Engineering  
Services, U.K.,  
B Flynn, Flynn and Rothwell, U.K.

2.11 Is Modernisation of Traditional Irrigation Systems in  
Arid Zones Economically Justified?  
D Yaron, The Hebrew University of Jerusalem, Israel,  
A Regev, Ministry of Agriculture, Israel.
2.12 Pumped Irrigation on the White and Blue Niles, Sudan.  
R M G Hewett, Sir Alexander Gibb & Partners, U.K.  

2.13 Successful Renovation of A Farmer's Canal: a case study from Bhutan.  
R van Bentum, Chirang Hill Irrigation Project, Bhutan,  
I Smout, University of Loughborough, U.K.  

3. IRRIGATION RESOURCES - POTENTIAL AND DEVELOPMENT

3.1 Integration of Hydrologic Models for Simulation Related To Irrigation Development.  
H Y P Ng, National Water Research Institute, Ontario, Canada.  

3.2 A Simple Mass-Balance Model and its Use in Investigating the Long Term Effects of Irrigation on Groundwater Quality.  
J H Tellam, J W Lloyd and N J Shaheen, University of Birmingham, U.K.  

3.3 Economic Impact of Sedimentation in Reservoirs: experience from Tungabhadra Project in India.  
M Satyanarayana and D Srivastava, Indian Agricultural Research Institute, New Delhi, India.  

3.4 Evaluating the Health Impact of Irrigation Reservoirs.  
R C Carter, Silsoe College, U.K.,  
J M Brook, WLPU Consultants, Ashford, U.K.,  
J M Jewsbury, Liverpool School of Tropical Medicine, U.K.  

3.5 An Agrological and Hydrologically Based Evaluation of Irrigation Potential in Zambia.  
A E Daka, National Irrigation Research Station, Mazabuka, Zambia.  
R Dudal, Catholic University of Leuven, Belgium.  

3.6 Development of Cropping Patterns for Irrigated Agriculture in West Africa With Special Reference to Nigeria.  
P R Maurya and V Kumar, Ahmadu Bello University, Nigeria.  

3.7 The Use of Treated Wastewater Effluents for Irrigation.  
P F Hillman and A J Dunn, IIS, University of Southampton, U.K.  

3.8 Design Criteria for Micro-Catchment Water Harvesting with Scarce Data.  
G Oron, P Heaton and J Ben-Asher, Ben-Gurion University, Israel.
3.9 Collector Wells for Exploiting the Regolith Aquifer for Small Scale Irrigation in Sri Lanka.
R Herbert and D P Ball, British Geological Survey, Wallingford, U.K.,
I D P Rodrigo, Water Resources Board, Colombo, Sri Lanka,
E P Wright, Aston Tirrold, Oxfordshire, U.K.

3.10 Irrigation Alternatives in Zimbabwe.
R A Lambert, Loughborough University, U.K.,
R J Owen, Zimbabwe University, Harare, Zimbabwe.

4. CONVEYANCE SYSTEMS

4.1 Reliability of Water Supply via a Chain of Pump Stations.
P R Darley, Howard Humphreys, U.K.

4.2 Equitable Distribution and Control of Irrigation Supplies for an On-demand Pressurised System.
A P G Russell, Sir William Halcrow & Partners, U.K.

4.3 Canal Lining: from the laboratory to the field and back again.
H Goldsmith and I W Makin, Overseas Development Unit, Hydraulics Research Ltd, U.K.

4.4 Simplified Design Charts for Concrete Lined Canals in Iraqi Alluvial Soils.
A S Aldabagh, University of Mosul, Iraq,
A A Dawood, Dijla Centre for Studies and Design of Irrigation Projects, Mosul, Iraq.

4.5 Design of Pipe Outlets For Irrigation and Drainage Works.
S K Al Naib and J E Sanders, Polytechnic of East London, U.K.

4.6 Computer Simulation of Manually Operated Irrigation Conveyance Systems Typical of Alberta, Canada.
D H Manz, University of Calgary, Alberta, Canada.

4.7 Regime Canal Design: theory & reality.
C E Rickard, Mott-MacDonald Group, Cambridge, U.K.

4.8 Improved Methods for Designing Sediment Control Structures.
P Lawrence and E Atkinson, Hydraulics Research, Wallingford, U.K.
4.9 Investigations into Tunnel-type Sediment Excluders. V A Chrysostomou, IIS, University of Southampton, U.K.

5. CROP WATER REQUIREMENTS AND IRRIGATION SCHEDULING

5.4 Peanut Yield as Affected by Deficit Irrigation, Soil Texture, Sowing Date and Irrigation Interval. R Kanber, O Tekinel, R Bastug, S Onder and N Baytorun, University of Çukurova, Turkey.

5.5 Cotton Yield, Evapotranspiration and Other Properties as Affected by Different Soil Series and Irrigation Programs under Çukurova Conditions. O Tekinel, R Kanber, R Bastug, S Onder and T Algoz, University of Çukurova, Turkey.

5.6 Co-Research with Farmers in Field Water Management: air entrapment effects. M E Parkes, Scottish Centre of Agricultural Engineering, U.K.

5.7 Studies of On-farm Water Management in Periyar-Vaigai Command Area in Tamil Nadu, India. S Purushothaman and M Chellamuthu, Tamil Nadu Agricultural University, Madurai, India.

5.8 Project or Overall Irrigation Efficiency. M G Bos and W Wolters, ILRI, Wageningen, The Netherlands.

5.9 Economic Surface Irrigation Within Environmental Constraints. W W Wallender, University of California, Davis, U.S.A.

5.10 Putting Theory into Practice - Simplified Scheduling Procedures for Smallholder Irrigation Schemes. M A Burton, IIS, University of Southampton, U.K.

6. IRRIGATION SYSTEM DESIGN AND EVALUATION

6.4 Level Basin Design for Smallholder Rice-based Irrigation Systems. S C Patra and R C Nayak, Water and Land Management Institute, Bhubaneswar, India.

6.6 Evaluating the Travelling Trickler Center Pivot. A M El-Khashab, Cairo University, Egypt.

6.9 Observations on the wetted zone beneath drip irrigated sugar cane in Mauritius.
M G Hodnett, J P Bell, and C H Batchelor, Institute of Hydrology, Wallingford, U.K.,
D A H Koon, Mauritius Sugar Research Institute, Mauritius.

6.10 The effects of trickle and conventional irrigation methods on some crops' yield and water use efficiency under Çukurova conditions.
O Tekinel, R Kanber, S Onder, N Baytorun and R Bastug, University of Çukurova, Turkey.

6.11 Biofouling in drip/trickle irrigation systems.
M G Kay, S F Tyrrel and P Howsam, Silsoe College, U.K.

6.12 Microbial clogging of drip irrigation emitters in effluent reuse systems.
H D Taylor, H W Pearson, University of Liverpool, U.K.,
D D Mara, University of Leeds, U.K.

7. WATER MANAGEMENT

7.1 Western and indigenous principles of irrigation water distribution.
P J Slabbers, Agricultural University, Wageningen, The Netherlands.

7.2 Analytical models for monitoring and evaluating irrigation water management: a comparison.
F Mioulet, H J G J M van Montfort and P J Slabbers, Agricultural University, Wageningen, The Netherlands.

7.3 Impact of unsteady flow on irrigation water distribution.
W Schuurmans, Delft University of Technology, The Netherlands.

7.4 The concept and management of minor irrigation systems: a study of the gap between perceptions and reality.
K M Manohar and K S Rama Rao, Kakatiya University, Warangal, India.

7.5 Water distribution: conflicting objectives of scheme management and farmers.

7.6 Influence of farmer's behaviour on water management practices.
W Fahim and A Rady, Water Research Centre, Cairo, Egypt.
7.7 Farmer Participation in Farm Water Management.  

7.8 Theoretically Well-Conceived and Operationally Ill-Operated Water Management Systems: a case study from India.  
M V Reddy, Institute for Social and Economic Change, Bangalore, India.

7.9 Field Water Requirement Impacts on the New Irrigation Area.  

7.10 Project Commissioning - Starting It Right.  
T R Franks, University of Bradford, U.K.

7.11 Operation Monitoring for Water Management: an example from a groundwater irrigation project.  
C Hyder and C F Ward, IIS, University of Southampton, U.K.

7.12 Appraisal of Irrigation Performance with Satellite Data and Georeferenced Information.  

7.13 Obstacles to Flow Control and Measurement in Irrigation Practice.  

8. IMPROVED SCHEME MANAGEMENT - STRATEGIES AND MEANS

8.1 Simulation Model for Irrigation Project Planning and Design.  
J Keller, A A Keller and R D Bliesner, Keller-Bliesner Engineering, Logan, U.S.A.

8.2 Economic Appraisal of Irrigation in A Water Scarce Region - An Extended Approach.  
A K Mitra, Gokhale Institute of Politics and Economics, Pune, India.

8.3 Improving Management of Center Pivot Irrigation Systems.  
G W Buchleiter, D F Heermann and H R Duke, USDA Agricultural Research Station, Fort Collins, U.S.A.
8.4 The Development of Self-Help Irrigation Schemes: experience from Malawi.
A S May, Hunting Technical Services Ltd., U.K.

8.5 A Successful Example of a Multidisciplinary Approach to Irrigation Scheme Planning and Implementation in Baluchistan.

8.6 A New Approach to Development, Operation and Maintenance of Irrigation Systems in Indonesia.

8.7 Extension Concepts Relating to Irrigation.
I S MacDonald, MacDonald & Associates, Hove, U.K.

8.8 Improving the Performance of Public Irrigation Schemes through Manpower Planning and Structured Training Programmes.
R Carter, Silsoe College, U.K.

8.9 Irrigation and the Microcomputer Revolution.
D Clarke, IIS, University of Southampton, U.K.

8.10 The Use of Simulation Models in the Management of Irrigation Systems.
R F Stoner, J I M Dempster, and S L Marsden, Mott-MacDonald Group, U.K.

8.11 Equipment Requirements for Managing Third World Irrigation Schemes.
K Sanmuganathan, Overseas Development Unit, Hydraulics Research, Wallingford, U.K.,
R Pitcher, Armfield Technical Education Co., Ringwood, U.K.
