

PROCEEDINGS OF THE FIFTH INTERNATIONAL SYMPOSIUM ON NUMERICAL MODELS  
IN GEOMECHANICS – NUMOG V/DAVOS/SWITZERLAND/ 6-8 SEPTEMBER 1995

# Numerical Models in Geomechanics

## NUMOG V

*Edited by*

G.N.PANDE

*University of Wales Swansea, UK*

S.PIETRUSZCZAK

*McMaster University, Hamilton, Ontario, Canada*

A.A.BALKEMA/ROTTERDAM/BROOKFIELD/1995

## Table of contents

Preface	XIII
1 <i>Constitutive relations for geological materials: Formulation and verification</i>	
Finite deformation theory for a Cam-Clay model <i>R.I. Borja &amp; C. Tamagnini</i>	3
Some recent advances in modeling rock salt creep <i>Z. Chen &amp; M.L. Wang</i>	9
Constitutive modelling of critical states in hypoplasticity <i>E. Bauer</i>	15
An elastoplastic model with damage for bonded geomaterials <i>C. Chazallon &amp; P.Y. Hicher</i>	21
An elastoplastic model for clay: Formulation and algorithmic aspects <i>A.E. Groen, R. de Borst &amp; S.J.M. van Eekelen</i>	27
On the mechanical response of partially saturated soils at low and high degrees of saturation <i>S. Pietruszczak &amp; G.N. Pande</i>	33
Derivation of equivalent hydro-mechanical properties of a highly fractured saturated granite <i>A. Millard, A. Stietel &amp; E. Treille</i>	39
Thermoplastic constitutive model for unsaturated soils: A prospective approach <i>A. Modaressi &amp; H. Modaressi</i>	45
Micromechanical analysis of a Schneebeil material specimen <i>F. Calvetti, A. Lugan &amp; R. Nova</i>	51
A cyclic elasto-plastic model for sand based on the generalized flow rule and its application <i>Y. Taguchi, A. Tateishi, F. Oka &amp; A. Yashima</i>	57
Drained behavior of sand with inherent transverse isotropy <i>K. Suzuki, T. Sugano &amp; E. Yanagisawa</i>	63
Modelling of soil behaviour under monotonic and cyclic loadings <i>A. Truty</i>	69

State boundary surface and anisotropy <i>D.Muir Wood &amp; J.Graham</i>	77
Kinematic hardening model for structured soil <i>D.Muir Wood</i>	83
Physico-chemical interactions between clay particles <i>A.Anandarajah</i>	89
A mechanistic model for multi-asperity contact between surfaces <i>A.Misra</i>	95
Viscoplastic augmentation of Hoek-Brown based plasticity model <i>R.G.Wan</i>	101
A model for water-saturated loose sand <i>A.Drescher, B.Birgisson &amp; K.Shah</i>	109
A unified formulation of constitutive relations for saturated and partially saturated soils <i>X.L.Li &amp; R.Charlier</i>	113
Undrained behaviour of very loose Hostun RF sand in triaxial compression and extension <i>R.Matiotti, E.Ibraim &amp; T.Doanh</i>	119
Modelling of initial and induced anisotropy in sand <i>F.Bahda, A.Saitta, J.Canou &amp; J.C.Dupla</i>	125
Use of the pressuremeter test for the determination of properties of sands obeying non associated Mohr-Coulomb criterion <i>I.Shahrour &amp; A.Kasdi</i>	133
Subloading surface model for soils <i>K.Hashiguchi &amp; Z.P.Chen</i>	139
 <b>2 Instability and strain localization in geomaterials</b>	
Shear band localization in partially saturated porous media <i>B.A.Schrefler, L.Sanavia &amp; C.E.Majorana</i>	147
Instability of saturated elastoplastic soils <i>J.P.Bardet</i>	153
Theoretical and numerical studies of constitutive stability and uniqueness <i>F.Darve, E.Flavigny &amp; M.Meghachou</i>	159
Loss of uniqueness of the solution in a boundary value problem <i>R.Chambon &amp; S.Crochepeyre</i>	165
Bifurcation analysis of frictional materials <i>H.P.Jostad &amp; S.Nordal</i>	173
Description of localized deformation in saturated cemented materials <i>S.Pietruszczak &amp; G.Xu</i>	181
Effects of strain localization in triaxial extension tests <i>P.V.Lade, J.A.Yamamuro &amp; B.D.Skyers</i>	187

A new approach to softening plasticity <i>R. B.J. Brinkgreve &amp; P.A. Vermeer</i>	193
Computation of localisation in undrained soil using adaptive mesh refinement <i>M.A. Hicks</i>	203
Modelling of strain softening and localization <i>D.F.E. Stolle</i>	209
A numerical scheme for modelling kinematic propagation of shear bands <i>X.R. Wang, D.H. Chan &amp; N.R. Morgenstern</i>	215
An experimental and numerical analysis of the stability problem in uniaxial compression <i>H. Schad &amp; F. Breinlinger</i>	223
 <b>3 Modelling of reinforced soil</b>	
Numerical analysis of reinforced earth walls via a homogenization method <i>C. Jommi, R. Nova &amp; F. Gomis</i>	231
Limit condition for unidirectionally reinforced soils <i>R. L. Michalowski &amp; A. Zhao</i>	237
The modelling of soil reinforced by used tyres – Application for retaining walls <i>M. Abdurahman, P. Jouve &amp; R. Bouzidi</i>	243
Increase of undrained shear strength and anisotropic characteristics of clay ground improved with sand compaction piles <i>A. Asaoka, T. Kodaka, M. Nozu &amp; T. Hirao</i>	249
 <b>4 Modelling of transient/ coupled problems</b>	
<b>4.1 Thermo/hydro-mechanical coupling</b>	
3-D DEM modelling of coupled thermo-mechanical response for a hypothetical nuclear waste repository <i>H. Hansson, L. Jing &amp; O. Stephansson</i>	257
A finite element solution for thermo-hydro-mechanical coupling taking into account heat convection <i>J.F. Shao</i>	263
Validation of a nonlinear coupled dynamic model with a centrifuge test of VELACS project <i>I. Shahrour, I. Benzenati &amp; A. Khoshrovan</i>	269
Thermal analysis for homogeneous and nonhomogeneous soils <i>I. Assali &amp; B.B. Budkowska</i>	275
Analysis of cyclic mobility effects using a modified densification model <i>T. Shiomi &amp; M. Yoshizawa</i>	281
Evaluation of coefficient of consolidation for nonlinear soil <i>O. Ravaska &amp; E. Vesala</i>	287

Computational modelling of frost heave <i>J.Hu &amp; A.P.S.Selvadurai</i>	293
<b>4.2 Flow through porous media</b>	
Two-dimensional moisture distributions in layered profiles beneath covered areas using transform solution techniques <i>S.Fityus &amp; D.W.Smith</i>	303
Calibration of infiltration boundary conditions for flow in partially saturated soils <i>J.R.McDougall, R.W.Sarsby &amp; N.J.Hill</i>	309
Estimation of seepage through spatially random soil by equivalent rectangles <i>G.M.Paice &amp; D.V.Griffiths</i>	315
A practical method of predicting seasonal ground movement <i>S.W.Rees &amp; H.R.Thomas</i>	321
<b>4.3 Environmental geomechanics</b>	
Strain and contamination history dependence in chemo-plasticity of clays subjected to environmental loads <i>T.Hueckel</i>	329
Transport modelling under transient flow conditions <i>R.K.Rowe &amp; P.Nadarajah</i>	337
Comparison of software modelling the transport of pollutants through saturated soil <i>L.Jendele, E.E.Hellawell &amp; A.H.C.Chan</i>	343
Laboratory estimation of the diffusion and partition coefficients of fluoride in kaolin clay <i>P.M.H.Kau, P.W.Hitchcock, D.W.Smith &amp; P.Binning</i>	349
Implications of non-equilibrium sorption on the interception-sorption trench remediation strategy <i>P.W.Hitchcock &amp; D.W.Smith</i>	355
<b>5 Numerical algorithms: Formulation and performance</b>	
Uncoupling of coupled flows in soil – A finite element method <i>D.Sheng &amp; K.Axelsson</i>	363
Development of a variational displacement discontinuity method: Application to some fracture problems <i>D.Kondo &amp; G.Samba</i>	369
Incremental analysis of large deformation using polar decomposition <i>F.Molenkamp &amp; A.J.Choobbasti</i>	375
On the indentation of a non-homogeneous elastic geomaterial: Analytical and computational estimates <i>A.P.S.Selvadurai</i>	381

A numerical solution of coupled heat and moisture transfer in unsaturated soil on a parallel supercomputer <i>H.R.Thomas &amp; C.L.W.Li</i>	391
Computation of collapse load using mixed finite elements <i>B.Bostrøm, S.Nordal &amp; G.Svanø</i>	397
Localization problems under volume constraints: A mixed formulation approach <i>M.Pastor, M.Quecedo &amp; O.C.Zienkiewicz</i>	403
Element performance in soil and rock plasticity <i>R.de Borst &amp; A.E.Groen</i>	411
Coupled FEM-EFGM for consolidation modelling <i>H.Modaressi &amp; P.Aubert</i>	417
Integration by FEM of viscous models: A comparison between three time-discrete schemes <i>P.Royis</i>	423
Applications of neural networks in stress wave problems in piles <i>Y.K.Chow, L.F.Liu &amp; W.T.Chan</i>	429
A neural network for soil compaction <i>I.A.Basheer &amp; Y.M.Najjar</i>	435
<b>6 Application of numerical techniques to practical problems</b>	
<b>6.1 Tunnels and underground structures</b>	
Interaction of rock bolts and shotcrete tunnel lining <i>A.Moussa &amp; G.Swoboda</i>	443
Numerical analysis of tunnel floor heaves in swelling ground <i>G.Anagnostou &amp; K.Kovári</i>	451
A three-dimensional finite element model of tunnelling <i>C.E.Augarde, H.J.Burd &amp; G.T.Houlsby</i>	457
Prediction of deformation behaviour of a tunnel in squeezing rock with time-dependent characteristics <i>Ö.Aydan, J.Ito, T.Akagi, T.Ito &amp; J.Sato</i>	463
Modelling of tunnel excavation in soft soil <i>S.Bernat, B.Cambou &amp; P.Dubois</i>	471
Numerical modelling of a tunnel excavated in expansive deep clay soil <i>S.Tacherifet, M.Al-Mukhtar &amp; J.C.Robinet</i>	477
Stress distribution due to tunnel excavation <i>A.J.Grashuis &amp; J.A.M.Teunissen</i>	483
Practical application of numerical modelling to vibrations in railway tunnels <i>J.J.Kaelin &amp; J.Stampller</i>	489

Prediction of surface settlement profiles due to tunnel excavation: Model tests and numerical analyses <i>T.Nakai, L.M.Xu &amp; H.Yamazaki</i>	495
Numerical modelling of an axial push test on a buried pipeline <i>C.F.Ng, I.C.Pyrah &amp; W.F.Anderson</i>	501
The long term convergence of a deep tunnel <i>F.Ferring, D.de Bruyn &amp; P.J.Huergo</i>	507
Numerical interpretation of in-situ tests in rocksalt hydrocarbon storage caverns <i>J.E.T.Quintanilha &amp; D.Nguyen-Minh</i>	513
Response of a tunnel in soft ground to longitudinal earthquake excitations <i>G.-S.Liou &amp; C.-Y.Hwang</i>	519
 <b>6.2 Slopes and embankments</b>	
Predicting large displacements of landslides <i>L.Vulliet</i>	527
Finite element analyses of two slope liquefaction case histories <i>M.A.Hicks &amp; R.Boughrarou</i>	533
Numerical analysis of deep excavation <i>T.Tamano, H.Tsuboi, S.Fukui, K.Haneda &amp; K.Harada</i>	539
Effects of changes in geometry on deformation behaviour under embankment loading <i>A.Asaoka, T.Noda &amp; G.S.K.Fernando</i>	545
Coupled dynamic analysis of San Fernando Dam <i>F.Laigle &amp; J.J.Fry</i>	551
Collapse settlement – A trap revealed <i>D.J.Naylor</i>	557
 <b>6.3 Piles and foundations</b>	
Analysis of piled-raft foundation <i>H.B.Poorooshasb, N.Miura &amp; A.Noorzad</i>	565
Grain size effect in bearing capacity of a strip foundation on sand <i>J.Teichman</i>	571
Finite layer analysis of pile groups in layered soils <i>L.D.Ta &amp; J.C.Small</i>	577
Bearing capacity of strip footing on layered subsoil <i>T.Schanz &amp; P.Gussmann</i>	583
3-D finite element analyses of the ultimate behavior of laterally loaded cast-in-place concrete piles <i>M.Kimura, T.Adachi, H.Kamei &amp; F.Zhang</i>	589

Prediction analyses of up-lift resistance of a belled foundation in cohesive soil <i>S. Sakajo, J.-C. Chai, T. Yoshimaru &amp; M. Kamimura</i>	595
Verification of an elastoplastic constitutive relation with shallow foundation tests <i>I. Shahrour &amp; M. Zaher</i>	601
Development of lateral deformation mechanisms around a pile <i>M.F. Bransby &amp; S.M. Springman</i>	607
The 3-D FE analysis of model group piles embedded in sand <i>A. Wakai, K. Ugai &amp; S. Gose</i>	613
Cyclic load-induced settlement of strip foundation on saturated clay <i>B.M. Das, G. Singh &amp; E.C. Shin</i>	619
The nonlinear stiffness of pile foundations <i>W.D.L. Finn &amp; G. Wu</i>	625
 <b>6.4 Other applications</b>	
Settlement computation for nuclear power plants: Rheological and geostatistical considerations <i>F. Laigle, J.J. Fry, E. Antoinet &amp; J.L. Costaz</i>	633
Modelling of mechanical effects of alkali-silica reaction in Beauharnois powerhouse <i>I. Kladek, S. Pietruszczak &amp; V. Gocevski</i>	639
Numerical analysis of rock blocks impacting a soil cushion <i>V. Labiouse, F. Descoedres &amp; S. Montani</i>	645
Train induced vibrations and its influence on the neighborhood <i>R. Le &amp; G. Schmid</i>	651
Finite element analysis of the effects of rising groundwater on a deep basement <i>R.I. Woods, S.J. Hughes &amp; A. Kuras</i>	657
Using a finite element program ABAQUS in predicting the cooling rates of hot mix asphalt <i>D.-H. Chen, M.M. Zaman, Y. Mehta &amp; J.G. Laguros</i>	663
Analysis of initial rock stress measurements in salt <i>S. Heusermann</i>	669
Some results from benchmark tests for geotechnical engineering <i>H.F. Schweiger &amp; M. Freiseder</i>	675
Some remarks on the validation of finite element codes in geotechnics <i>J.J. Brioist, P. Humbert &amp; Ph. Mestat</i>	681
Finite element analysis of the effect of drainage conditions on the in-situ shear vane test <i>P.A. Lane &amp; D.V. Griffiths</i>	687
The passive earth pressure distribution on the trap door <i>T. Adachi, T. Tamura, M. Kimura &amp; S. Aramaki</i>	693
